

# Javascript Conditionals & Loops

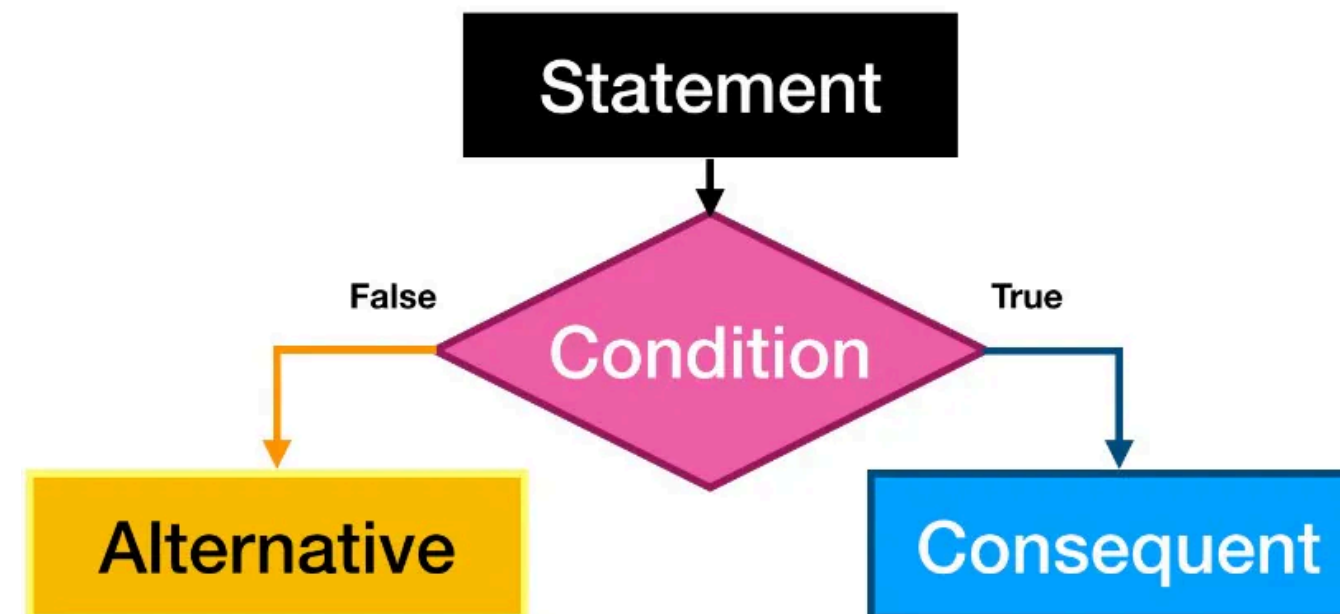

# Javascript Conditionals

Conditionals are used to make decisions in code. They let your program execute different blocks of code depending on whether a certain condition is true or false.

If, else if, else

Ternary Operator

Switch Case

# Javascript Loop

Loops allow you to repeat a block of code multiple times. Great for tasks like processing lists, counting, or retrying actions.

**for Loop**

**while Loop**

**do...while Loop**

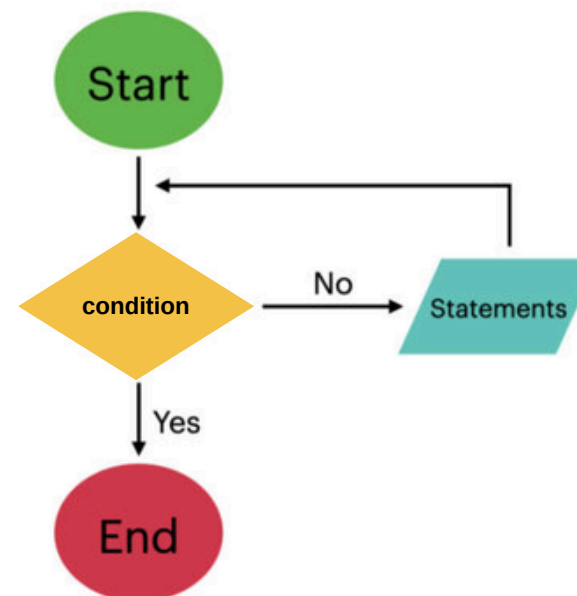

**Looping Through Arrays**

**for...of**

```
const fruits = ["apple", "banana", "cherry"];
for (const fruit of fruits) {
  console.log(fruit);
}
```

**forEach**

```
const veggies = ["potato", "onion", "tomato"];
veggies.forEach(veggie => {
  console.log(veggie);
});
```
